

WHAT IS CLAIMED IS:

1. A multi-functional carrying bag, comprising:

a) a center storage compartment with front, rear, side, top and bottom walls for forming a center interior storage space therein; said top wall having an opening for access
5 to said center interior storage space;

b) an upper front storage compartment with front, rear, top, side and bottom walls for forming an upper interior storage space therein and a lower front storage compartment with top, front, rear, side and bottom walls for forming a lower interior storage space therein;

10 c) a rear storage compartment with top, front, rear, side and bottom walls for forming a rear interior storage space therein;

d) a first side storage compartment with exterior, interior, front, rear and bottom walls for forming a first side interior storage space therein;

e) a second side storage compartment with exterior, interior, front, rear and
15 bottom walls for forming a second side interior storage space therein;

f) the rear wall of said upper front storage compartment forming the front wall of said center storage compartment;

g) the top wall of said lower front storage compartment forming the bottom wall of said center storage compartment; and the rear wall of said lower front storage
20 compartment forming a part of the rear wall of said rear storage compartment;

h) a part of the rear wall of said rear storage compartment forming a part of the rear wall of said center storage compartment; and

i) the interior wall of each of said first and second side storage compartments forming the opposing side walls of said center storage compartment.

5

2. A multi-functional carrying bag in accordance with Claim 1, wherein said top wall of said center storage compartment includes a top zipper member for access to said center interior storage space by a user.

10 3. A multi-functional carrying bag in accordance with Claim 1, wherein a part of said rear wall of said center storage compartment forms a wall of an inner storage pouch having an interior pouch storage space therein.

15 4. A multi-functional carrying bag in accordance with Claim 3, wherein said inner storage pouch includes a pouch zipper member for access to said interior pouch storage space by the user.

20 5. A multi-functional carrying bag in accordance with Claim 1, wherein said upper front storage compartment includes an upper front zipper member in the top wall thereof for access to said upper interior storage space thereof by a user.

6. A multi-functional carrying bag in accordance with Claim 1, wherein said rear wall of said upper front storage compartment includes a card sleeve member attached thereto for forming a plurality of sleeve receiving slots for holding credit cards and personal items therein.

5

7. A multi-functional carrying bag in accordance with Claim 1, wherein said rear wall of said upper front storage compartment includes a pen holder sleeve member attached thereto for forming a sleeve opening for holding a pen therein.

10

8. A multi-functional carrying bag in accordance with Claim 1, wherein said rear wall of said upper front storage compartment includes a holding strap with a key O-ring attached thereto for holding a key chain and keys of the user.

15

9. A multi-functional carrying bag in accordance with Claim 1, wherein each of said side walls of said upper front storage compartment are expandable to an opened configuration and to collapsed configuration relative to said front and rear walls of said upper front storage compartment.

20

10. A multi-functional carrying bag in accordance with Claim 1, wherein one of said expandable side walls of said upper front storage compartment includes a mirror holding strap having a first end and a second end.

11. A multi-functional carrying bag in accordance with Claim 10, wherein said first end of said mirror holding strap is fixedly attached to one of said expandable side walls and said second end is attached to a mirror frame having a mirror therein.

5 12. A multi-functional carrying bag in accordance with Claim 11, wherein said mirror frame and mirror are received within one of said sleeve receiving slots of said card sleeve member.

10 13. A multi-functional carrying bag in accordance with Claim 1, wherein said lower front storage compartment includes a lower front zipper member in the top wall thereof for access to said lower interior storage space thereof by the user.

15 14. A multi-functional carrying bag in accordance with Claim 1, wherein said bottom wall of said lower front storage compartment includes a sleeve pouch formed thereon having a sleeve opening therethrough for receiving a calculator of the user.

15. A multi-functional carrying bag in accordance with Claim 1, wherein said rear storage compartment includes a rear zipper member in the top wall thereof for access to said rear interior storage space thereof by the user.

16. A multi-functional carrying bag in accordance with Claim 1, wherein each of said first and second side storage compartments include a magnetic closure member having a first magnetic bar within said exterior wall and a second magnetic bar within said interior wall for opening and closing of each of said side interior storage spaces of said first and second side storage compartments, respectively, by the user.

17. A multi-functional carrying bag in accordance with Claim 1, wherein one of said side interior storage spaces of said side storage compartments is of a size and shape for receiving an eyeglass holding case therein.

18. A multi-functional carrying bag in accordance with Claim 1, wherein each of said exterior walls of said side storage compartments includes belt holding loops each having belt buckle members thereon.

19. A multi-functional carrying bag in accordance with Claim 18, further including means for carrying said carrying bag which includes an adjustable carrying strap having first and second ends.

20. A multi-functional carrying bag in accordance with Claim 19, wherein each of said belt buckle members are connected to said first and second ends of said adjustable carrying strap, respectively.

21. A multi-functional carrying bag in accordance with Claim 1, wherein said carrying bag includes a bottom wall; said bottom wall of said carrying bag has a plurality of foot members thereon.

5 22. A multi-functional carrying bag in accordance with Claim 1, wherein said center interior storage space of said center storage compartment is of a shape and size for storing personal items, accessories, cosmetics or toiletries, including a personal address book, a notebook, a day planner, a paperback book, a flashlight, a cosmetic traveling case or a toiletry kit by the user.

10 23. A multi-functional carrying bag in accordance with Claim 4, wherein said inner storage pouch of said center storage compartment is of a shape and size for storing paper currency and coins by the user.

15 24. A multi-functional carrying bag in accordance with Claim 1, wherein said lower interior storage space of said lower front storage compartment is of a size and shape for storing a wallet, a checkbook case, or larger personal items therein.

20 25. A multi-functional carrying bag in accordance with Claim 1, wherein said rear interior storage space of said rear storage compartment is of a size and shape for storing a notebook, an address book or larger personal items therein.

26. A multi-functional carrying bag in accordance with Claim 1, wherein each of said side interior storage spaces of said side storage compartments is of a size and shape for holding a eyeglass holding case and electronic accessories including a cell phone, a beeper, a PDA unit, or a pocket camera.

5

27. A multi-functional carrying bag in accordance with Claim 1, wherein said carrying bag is made from materials selected from the group consisting of leather, faux leather, flexible plastic and woven fabric.
